# Downloaded Files

This report identifies the most popular files downloaded from your site.

## Downloaded Files Trend

No data is available for this graph.

## Downloaded Files

No data is available for this graph.

## Downloaded Files

No data is available for this table.

### Downloaded Files - Help Card

#### Column Definitions

##### Files

The path and filename of the file being analyzed.

##### Downloads

Number of times the specified file was downloaded by a visitor. If an error occurred during a transfer, the transfer is not counted. Note that downloaded PDF files may cause an inflated count.

##### Visits

Number of visits that accessed the specified files. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

### **Report Descriptions**

If you are using an SDC data source, then this report is not applicable.

This information shows you the most popular downloadable files on your web site. Files that don't appear on the list, or appear low on the list, may require maintenance such as decreasing the file size, improving link placement, or elimination to make room for more popular content.

# Pages

This report identifies the most popular pages on your site and shows you key metrics for each page such as Visits, Page Views and Average Time Viewed.

## Pages Trend

No data is available for this graph.

## Pages

No data is available for this graph.

## Pages

No data is available for this table.

## Pages - Help Card

### Column Definitions

#### Pages

Any displayed page. You can specify for each profile the types of files that qualify as a page. These settings can be changed by the Webtrends administrator.

#### Visits

Number of visits to this page. A visit is a series of actions that begins when a visitor views the first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Views

Number of times this page was viewed by visitors.

#### Average Time Viewed

Average length of time, in seconds, that the specified page was viewed.

#### Average Time to Serve

Average amount of time (in milliseconds) it took to serve each document during the specified time interval. The time to serve spans from the time the server got a page request until it transmitted all the data.

**Note:** Note that in order to show a total for this column, the value is computed to 2 decimal places. However, because the data for each row is an integer measured in milliseconds, the two decimal places are not significant for Average Time to Serve row values. If the entire column shows values of zero, your web server may not be logging Time to Serve information.

### Report Descriptions

Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.

# Pages

This report identifies the most popular pages on your site and shows you key metrics for each page such as Visits, Page Views and Average Time Viewed.

## Pages - Help Card

### Column Definitions

#### Pages

Any displayed page. You can specify for each profile the types of files that qualify as a page. These settings can be changed by the Webtrends administrator.

#### Visits

Number of visits to this page. A visit is a series of actions that begins when a visitor views the first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Views

Number of times this page was viewed by visitors.

#### Average Time Viewed

Average length of time, in seconds, that the specified page was viewed.

#### Average Time to Serve

Average amount of time (in milliseconds) it took to serve each document during the specified time interval. The time to serve spans from the time the server got a page request until it transmitted all the data.

**Note:** Note that in order to show a total for this column, the value is computed to 2 decimal places. However, because the data for each row is an integer measured in milliseconds, the two decimal places are not significant for Average Time to Serve row values. If the entire column shows values of zero, your web server may not be logging Time to Serve information.

### Report Descriptions

Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.

## Referring Site

This report identifies web sites that refer visitors to your site. The top referrers are your site's primary acquisition channels, and may include a partner sites, search engines, portals or marketing programs.

Referring Site: Query Results: Site = \*google\*, \*yahoo\*, \*msn\*, \*MyNet\*, \*search\*, \*AltaVista\*, \*aol\*, \*seznam\*, \*Web.de\*, \*ask\*,...cho\*, \*Searchalot\*, \*Biglobe\* OR Site = \*Baidu\*, \*3721\*, \*163\*, \*cade\* AND Site ≠ \*syndication\*

## Referring Site - Help Card

### Column Definitions

#### Referring Sites

A web site that refers a visitor to your site by linking to it.

#### Site

The specific referring site being analyzed.

#### Visits

Number of times the specified site referred visitors to your site.

#### %

Percentage of referrals that came from the specified site.

#### Direct Traffic

Represents traffic to the web site with no referrer as one of the following: 1) the visitor typed the domain name directly into their browser, 2) the visitor bookmarked the site, 3) the visitor clicked on an email, shortcut, or other direct link, 4) Firewalls and/or proxies stripped out the referrer and replaced it with a dash "-".

Note: If "Direct Traffic" is 100% of all your traffic, then you are probably not logging the "referrer" field in your log files. Please see your manual or the Webtrends Knowledgebase to enable extended logging on your web servers.

#### Hidden-Referrer

A value indicating that Internet security software such as Zone Alarm Pro, Symantec's Norton Internet Security, or a proxy server modified a web request to mask the referring URL.

### Report Descriptions

You can use this page to determine which sites are referring the most visitors to your site. This can help when considering the most effective ways and places to attract visitors.

# Pages

This report identifies the most popular pages on your site and shows you key metrics for each page such as Visits, Page Views and Average Time Viewed.

## Pages - Help Card

### Column Definitions

#### Pages

Any displayed page. You can specify for each profile the types of files that qualify as a page. These settings can be changed by the Webtrends administrator.

#### Visits

Number of visits to this page. A visit is a series of actions that begins when a visitor views the first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Views

Number of times this page was viewed by visitors.

#### Average Time Viewed

Average length of time, in seconds, that the specified page was viewed.

#### Average Time to Serve

Average amount of time (in milliseconds) it took to serve each document during the specified time interval. The time to serve spans from the time the server got a page request until it transmitted all the data.

**Note:** Note that in order to show a total for this column, the value is computed to 2 decimal places. However, because the data for each row is an integer measured in milliseconds, the two decimal places are not significant for Average Time to Serve row values. If the entire column shows values of zero, your web server may not be logging Time to Serve information.

### Report Descriptions

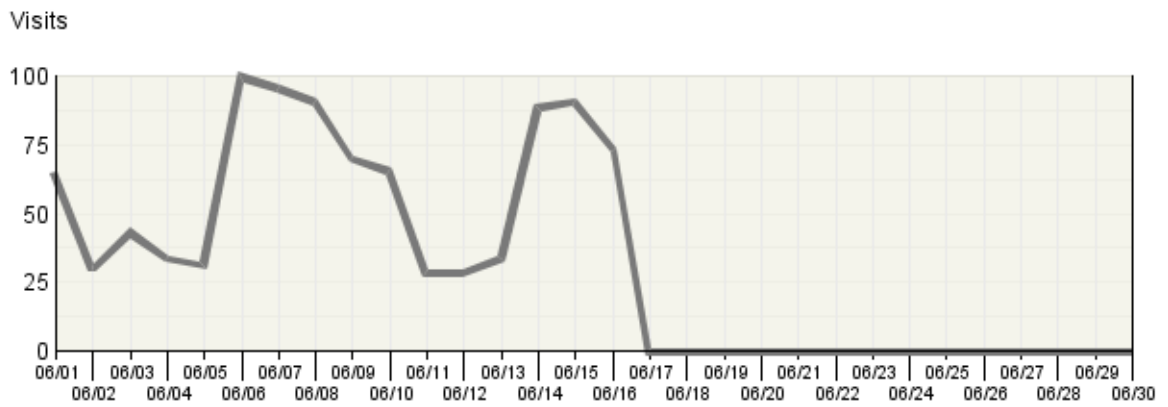

Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.

## Pages - Help Card

### Column Definitions

#### Pages

Any displayed page. You can specify for each profile the types of files that qualify as a page. These settings can be changed by the Webtrends administrator.

#### Visits

Number of visits to this page. A visit is a series of actions that begins when a visitor views the first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Views

Number of times this page was viewed by visitors.

#### Average Time Viewed

Average length of time, in seconds, that the specified page was viewed.

#### Average Time to Serve

Average amount of time (in milliseconds) it took to serve each document during the specified time interval. The time to serve spans from the time the server got a page request until it transmitted all the data.

**Note:** Note that in order to show a total for this column, the value is computed to 2 decimal places. However, because the data for each row is an integer measured in milliseconds, the two decimal places are not significant for Average Time to Serve row values. If the entire column shows values of zero, your web server may not be logging Time to Serve information.

### Report Descriptions

Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.

# Pages

This report identifies the most popular pages on your site and shows you key metrics for each page such as Visits, Page Views and Average Time Viewed.

Pages Trend: Query Results: Pages (URLs) = \*comprar\* OR Pages (URLs) = \*where\* OR Pages (URLs) = \*representante\* OR Pages (URLs) = \*sales\* OR Pages (URLs) = \*thank\* OR Pages = \*comprar\*

---

## Pages - Help Card

### Column Definitions

#### Pages

Any displayed page. You can specify for each profile the types of files that qualify as a page. These settings can be changed by the Webtrends administrator.

#### Visits

Number of visits to this page. A visit is a series of actions that begins when a visitor views the first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Views

Number of times this page was viewed by visitors.

#### Average Time Viewed

Average length of time, in seconds, that the specified page was viewed.

#### Average Time to Serve

Average amount of time (in milliseconds) it took to serve each document during the specified time interval. The time to serve spans from the time the server got a page request until it transmitted all the data.

**Note:** Note that in order to show a total for this column, the value is computed to 2 decimal places. However, because the data for each row is an integer measured in milliseconds, the two decimal places are not significant for Average Time to Serve row values. If the entire column shows values of zero, your web server may not be logging Time to Serve information.

### Report Descriptions

Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.

# Pages

This report identifies the most popular pages on your site and shows you key metrics for each page such as Visits, Page Views and Average Time Viewed.

## Pages - Help Card

### Column Definitions

#### Pages

Any displayed page. You can specify for each profile the types of files that qualify as a page. These settings can be changed by the Webtrends administrator.

#### Visits

Number of visits to this page. A visit is a series of actions that begins when a visitor views the first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Views

Number of times this page was viewed by visitors.

#### Average Time Viewed

Average length of time, in seconds, that the specified page was viewed.

#### Average Time to Serve

Average amount of time (in milliseconds) it took to serve each document during the specified time interval. The time to serve spans from the time the server got a page request until it transmitted all the data.

**Note:** Note that in order to show a total for this column, the value is computed to 2 decimal places. However, because the data for each row is an integer measured in milliseconds, the two decimal places are not significant for Average Time to Serve row values. If the entire column shows values of zero, your web server may not be logging Time to Serve information.

### Report Descriptions

Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.

# Referring Site

This report identifies web sites that refer visitors to your site. The top referrers are your site's primary acquisition channels, and may include a partner sites, search engines, portals or marketing programs.

Referring Site: Query Results: Site =

## Referring Site - Help Card

### Column Definitions

#### Referring Sites

A web site that refers a visitor to your site by linking to it.

#### Site

The specific referring site being analyzed.

#### Visits

Number of times the specified site referred visitors to your site.

#### %

Percentage of referrals that came from the specified site.

#### Direct Traffic

Represents traffic to the web site with no referrer as one of the following: 1) the visitor typed the domain name directly into their browser, 2) the visitor bookmarked the site, 3) the visitor clicked on an email, shortcut, or other direct link, 4) Firewalls and/or proxies stripped out the referrer and replaced it with a dash "-".

Note: If "Direct Traffic" is 100% of all your traffic, then you are probably not logging the "referrer" field in your log files. Please see your manual or the Webtrends Knowledgebase to enable extended logging on your web servers.

#### Hidden-Referrer

A value indicating that Internet security software such as Zone Alarm Pro, Symantec's Norton Internet Security, or a proxy server modified a web request to mask the referring URL.

### Report Descriptions

You can use this page to determine which sites are referring the most visitors to your site. This can help when considering the most effective ways and places to attract visitors.

# General Statistics

The 3M WebTrends Basic Dashboard provides a high level view of selected WebTrends reports which are common to most web site owners. To access the full sized report, click on the report title.

## Referring Site - Help Card

### Column Definitions

#### Referring Sites

A web site that refers a visitor to your site by linking to it.

#### Site

The specific referring site being analyzed.

#### Visits

Number of times the specified site referred visitors to your site.

#### %

Percentage of referrals that came from the specified site.

#### Direct Traffic

Represents traffic to the web site with no referrer as one of the following: 1) the visitor typed the domain name directly into their browser, 2) the visitor bookmarked the site, 3) the visitor clicked on an email, shortcut, or other direct link, 4) Firewalls and/or proxies stripped out the referrer and replaced it with a dash "-".

Note: If "Direct Traffic" is 100% of all your traffic, then you are probably not logging the "referrer" field in your log files. Please see your manual or the Webtrends Knowledgebase to enable extended logging on your web servers.

#### Hidden-Referrer

A value indicating that Internet security software such as Zone Alarm Pro, Symantec's Norton Internet Security, or a proxy server modified a web request to mask the referring URL.

### Report Descriptions

You can use this page to determine which sites are referring the most visitors to your site. This can help when considering the most effective ways and places to attract visitors.

## General Statistics

The 3M WebTrends Basic Dashboard provides a high level view of selected WebTrends reports which are common to most web site owners. To access the full sized report, click on the report title.

## Campaign IDs

This report shows activity occurring during the report time period segmented according to the campaign ID of the most recent campaigns. For the report time period, all conversions and other activities are tracked and attributed to the last campaign to which visitors responded. Thus, even if the conversion does not happen on the first visit generated by the most recent campaign, the appropriate source is "credited" with the conversion.

### Campaign IDs Trend

**No data is available for this graph.**

### Campaign IDs

## Campaign IDs - Help Card

### Column Definitions

#### **% of All Visits**

Percentage of the total number of visits during the reporting period.

#### **Average Revenue per Order**

This measure reflects the average monetary amount generated from completed purchases.

#### **Average Units per Order**

This measure reflects the number of units (products) from completed purchases.

#### **Average Visit Duration (Minutes)**

The length (measured in minutes) of a visit to your web site.

#### **Average Visit Page Views**

The number of pages viewed during a visit.

#### **Campaign ID**

A unique campaign identifier, used to associate campaign success, cost, etc. that may be spread across marketing activities.

#### **Clickthroughs**

A single instance of a click on an advertisement link.

#### **Daily Campaign Visitors**

A count of the number of daily visitors for each campaign.

#### **Dynamic**

Describes a measure that Webtrends has automatically adjusted to the time period selected in the Calendar. For example, the Dynamic Visitors (monthly) column is displayed automatically when a user selects a monthly time frame in the report calendar. If the user selects a weekly time frame, the same column shows Dynamic Visitors (weekly). Because tracking a measure over a longer time period does not provide the same results as adding the results for several shorter time frames, dynamically adjusting the time frame of the measure to the time frame of the report can provide more accurate data. To use a dynamic measure, make sure when configuring the custom report that the report includes all five time periods for the measure. For example, to use the Dynamic Visitors measure, a report must include Daily Visitors, Weekly Visitors,

Monthly Visitors, Quarterly Visitors, and Yearly Visitors.

**Hits**

Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

**Monthly Campaign Visitors**

A count of the number of monthly visitors for each campaign.

**New Campaign Visitors**

A count of the number of new visitors for each campaign.

**Orders**

This measure reflects the number of orders from completed purchases.

**Page Views**

A hit to any file classified as a page. In order to view a web page with embedded images, for example, a browser must retrieve multiple files. The page and its embedded files counts as a single page view.

**Quarterly Campaign Visitors**

A count of the number of quarterly visitors for each campaign.

**Revenue**

This measure reflects the monetary amount generated from completed purchases.

**Units**

This measure reflects the number of units (products) from completed purchases.

**Visits**

A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

Note that if the dimension changes state during the course of a visit (such as a visitor changing from non-customer to customer), the visit will be recorded for both states. In such cases, the total of visits in this report may be greater than the number of visits reported in the Overview. In the Key Metrics Summary report for example, if a visit spans several hours, it is recorded in each of the hours.

**Weekly Campaign Visitors**

A count of the number of weekly visitors for each campaign.

**Yearly Campaign Visitors**

A count of the number of yearly visitors for each campaign.

---

## Report Descriptions

### **Briefly:**

The term "campaign ID" describes the code used for a campaign driving traffic to a website.

This report provides an extremely detailed view of activities generated by visitors' most recent campaigns during the report time period. For the report time period, all conversions and other activities are tracked and attributed to the last campaign to which visitors responded. Thus, even if the conversion does not happen on the first visit generated by the most recent campaign, the appropriate source is "credited" with the conversion. This report requires the activation of Visitor History and the use of persistent cookies.

This report uses a dimension based on Visitor History, which requires that visitors be "strongly" identified using a session tracking method in addition to IP address and user agent. If this report is empty and your site received traffic that should be reflected in it, make sure you that both activate Visitor History in the profile and specify a session tracking method other than IP address. For more information about activating Visitor History and specifying a session tracking method, see the Webtrends Administration Help.

### **Uses and Interpretation:**

Use this report to determine the campaign IDs that generate the highest amounts of desired activity. As you launch new campaigns, or tweak campaign messaging, note how your actions change the results. Are visitors from a particular campaign viewing more pages or making more purchases? Are there certain campaigns that tend to generate the best response?

Because Webtrends counts one visit for each campaign viewed, and a visitor may view several campaigns in one visit, this report does not show totals for visit-related measures. Similarly, an order may contain several campaigns, and therefore the report does not provide totals for orders.

This report uses a dimension based on Visitor History, which requires that visitors be "strongly" identified using a session tracking method in addition to IP address and user agent. If this report is empty and your site received traffic that should be reflected in it, make sure you that both activate Visitor History in the profile and specify a session tracking method other than IP address. For more information about activating Visitor History and specifying a session tracking method, see the Webtrends Administration Help.

Visitors Who Visited More Than Once	282,090
Avg Visits per Visitor	1.22

## Content Groups and Sub-Groups

This report shows patterns of traffic to related groups of pages on your site. Content groups can show how visitors are accessing information categories that may not reflect the organization of your web site. For example, you may want to look at visits by content area, or find out how many visitors use summaries or abstracts of site content.

## Content Groups and Sub-Groups - Help Card

### Column Definitions

#### **% of Visits**

Percentage of visits for this row compared to the total visits for this table.

#### **Average Time Viewed (seconds)**

Amount of time (in seconds) that a page was viewed.

#### **Content Group**

A defined group of web pages with specific things in common, such as the same types of products, services, or information.

#### **Content Sub-Group**

A defined sub-group of web pages with specific things in common, such as the same types of products, services, or information.

#### **Page Views**

A hit to any file classified as a page. In order to view a web page with embedded images, for example, a browser must retrieve multiple files. The page and its embedded files counts as a single page view.

#### **Visits**

A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

Note that if the dimension changes state during the course of a visit (such as a visitor changing from non-customer to customer), the visit will be recorded for both states. In such cases, the total of visits in this report may be greater than the number of visits reported in the Overview. In the Key Metrics Summary report for example, if a visit spans several hours, it is recorded in each of the hours.

### Report Descriptions

The information on this page can show you which content groups were most popular. This will reveal the reasons people visit your web site, and what is most interesting and least interesting to them.

# General Statistics

The 3M WebTrends Basic Dashboard provides a high level view of selected WebTrends reports which are common to most web site owners. To access the full sized report, click on the report title.

# Top Visitors

This report provides information about individual visitor activity on your site. Top visitors are identified by cookie, IP address, or domain name, with the most accurate identification method taking priority. If you use cookies to track visits, Webtrends can differentiate between traffic from different visitors with the same IP address.

## Top Visitors - Help Card

### Column Definitions

#### Visitor

The IP address, domain name, or cookie of the visitor.

#### Visits

Number of times the specified visitor visited your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Hits

Number of hits attributed to the specified visitor. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

### Report Descriptions

Consider the visitors who use the site most, and tailor your site to their interests and needs. If your site is an intranet, notice which employees use the site most, and find out what they like about it. You might also get feedback from those who use it the least and find out what they are looking for.

**Note:** If a visitor has a dynamic IP address, or if a group of visitors are behind a proxy server or firewall, this data might be misleading. In the case of a dynamic IP address, multiple IP addresses could be shown for a single visitor, and in the case of a firewall or proxy server, one IP address could be used by more than one visitor.

# Visitors Trend

This report shows how many times visitors visited your web site and how long they stayed. The information is divided into time slices based on the duration of the log file. Some visits may span more than one time interval, and will be counted in each interval where they appear. The sum of visits for all intervals may therefore exceed the total visits shown in the Overview Dashboard page.

## Visitors Trend - Help Card

### Column Definitions

#### Time Interval (hour, day, etc.)

A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

#### Active Visits

Number of active visits to your web site. If a visit spans multiple time intervals, it is counted in each interval. Every visit from a visitor is counted, even if the same visitor came to your web site multiple times. Also included are zero-length visits. A zero-length visit occurs when all hits for that visit are logged with the exact same time stamp.

#### Visitors

Number of individuals who visited your site during the report interval. For a daily report, if someone visits more than once, that person is counted only the first time he or she visits. Values of "-" indicate that the detailed data required is not available. This situation occurs when the Top Visitors report has reached its configured limit or when reports for the corresponding period are turned off. For non-daily reports, the visitor measure total is "-" since the same visitor can be counted in multiple intervals.

#### New Visitors

Number of visitors who had never visited your web site before.

#### Average Visit Duration

The average amount of time visitors spent at your site within the given time interval. The data is formatted as hh:mm:ss (hours:minutes:seconds). The average visit duration is calculated by dividing the value from the Visitor Minutes column by the value from the Active Visits column.

#### Visitor Minutes

Number of minutes your web site was viewed, regardless of who was viewing it.

## Report Descriptions

Use this page to determine which times your web site is busiest.

Daily averages cut off visits that continue into the next day, whereas weekly averages do not. Therefore, weekly averages may appear a bit longer than daily averages.

**Total** - The total for the column. Visits may span more than one time interval and are counted for each hour in this report. We therefore do not provide a total, which would be misleading.

**Average** - This row gives the average for each column.

# Visits by Number of Pages Viewed

This report shows you how many times visitors viewed one page, how many viewed two pages, etc.

### Visits by Number of Pages Viewed - Help Card

#### Column Definitions

##### Number of Pages Viewed

The number of pages viewed during a visit. If the visitor viewed only non-page files such as a .gif or a .jpeg, the count of pages viewed is zero for that visit.

##### Visits

Number of visits by visitors who viewed the specified number of pages. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

##### %

Percentage of total visits by people who viewed the specified number of pages.

#### Report Descriptions

You can use this information to quickly find out the number and percentages of viewers who read a given number of pages on your site. If most visitors only view a few pages, it may indicate that they cannot find the content they are looking for.

Visits with 0 pages are visits where the only hits are to files that do not constitute pages, such as images.

## Visits by Day of the Week

This report shows the activity for each day of the week within the reporting period. Unsuccessful hits are not included.

### Visits by Day of the Week

---

### Visits by Day of the Week

Day	Visits	% Visits

<b>Total</b>	<b>3,533,429</b>	<b>100.00%</b>

## Visits by Day of the Week - Help Card

### Column Definitions

#### Day

Specified day of the week being tracked.

#### Visits

Number of visits on the specified day of the week. If the report period is longer than one week, and there are, for example, two Mondays, the value represented includes the combined total of both Mondays. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### %

Percentage of total visits that occurred on the specified day of the week.

---

### Report Descriptions

Number of visits on the specified day of the week. If the report period is longer than one week, and there are, for example, two Mondays, the value represented includes the combined total of both Mondays. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.
